(LISTED BELOW)

SUPPLEMENT TO  
REPORT NO.

THIS IS UNEVALUATED INFORMATION

50X1

the following installations not

identified on this town map of Ufa:

- 1) Civilian police station.
- 2) NKVD headquarters.
- 3) Music School.
- 4) Summer theater and park.
- 5) Lumber yards - commonly called Gypsy Field.

Factories in Ufa area:

- 6) There is a large motor plant (Motornyi) located 15 - 20 kilometers east of Ufa on the railroad line. This plant was opened in 1935 and at that time it was the largest such plant in the USSR. I understood that it was to produce all types of motors: automobile, aircraft, tank, and electric.
- 7) About two kilometers west of Ufa, the railroad junctions with a road from the south. On this road approximately 150 kilometers from the junction is Ishembaevo (53°26'N, 56°00'E). At Ishembaevo there is a large industrial plant serving the oil industry. The factory looks like a large one story building but there are two or three levels built below the ground line. I do not know exactly what was done in this plant but I do know it contained a shop for repairing oil well equipment. The plant was generally thought to be very important.

2. Places correctly identified on town map

- 8) I can attest to the correct identification of the following numbered places on this map: 24, 62, 68 - 76, 91, 112, 117, 118.
